A project for Rome

We drive citizens of Rome toward the creation of a new model of energy transition, represented by **Renewable Energy Communities**.

Renewable Energy Communities represent a powerful social and counter-energy poverty tool.

RENEWABLE ENERGY FOR ALL

Sustainable, affordable, generative

An inclusive platform to maximize inclusion to combat energy poverty

We are working on the creation of a digital, open and free platform that can guide users in the establishment of Renewable Energy Communities in the urban area. We offer accessible tools, resources and concrete expertise to citizens with the goal The goal is to, with the aim of overcoming the main difficulties, in the development of this transition model.

We offer accessible tools, resources and concrete expertise to citizens

We help create a community of people

For us, the renewable energy community is the ideal junction between the policies of **climate sustainability**, and a new form of **alternative economic and social prosperity**, capable of creating a positive culture in the territories of human settlement.

We promote energy efficiency and renewable energy communities

SUN4U aims to foster the creation of Local Energy Communities based on awareness, trust and solidarity., including vulnerable households, and contribute to the **reduction of dependence on fossil fuels** and the increase of **clean energy for all**.
